

Sliding Krabban Clip | KG

PRODUCT FEATURES

- Clip is installed with telescopic sleeve H30-H565.
- With thin insulation, washer H06-H09 is used.
- Fastener is adapted to relevant substrate.

Krabban clip with telescopic sleeves is an appropriate fastening for:

- standing seam roofing systems made of aluminium, copper, steel sheet metal and zinc
- stainless seamed or welded

The shape of the telescopic sleeve provides the required compression of the insulation without risk of damage to the sheet metal. The telescopic effect should be at least 10% of the insulation thickness, but always at least 20 mm. The Krabban system is installed independently of the positioning of the insulation joints in relation to the seam, which eliminates the risk of gaps in the insulation.

PRODUCT DATA

Material	Thickness	Quality
Hot dip galvanised Vfz 275 g/m ²	Upper part 0.4 mm	EN 10142
	Lower part 0.6 mm	EN 10142

Strength	Centric load	Movement capacity
Breaking load	1080N	± 15 mm
Characteristic value	1030N	

Refers to the clip's strength installed with telescopic sleeve or washer type H. Presupposes that attachment to relevant substrate is not decisive.
